

- Carbon metabolism
- Translation
- generation of precursor metabolites and energy
- amino acid metabolic process
- nucleobase-containing small molecule metabolic pro
- carbohydrate metabolic process
- tRNA metabolic process
- Biosynthesis of cofactors
- small molecule catabolic process
- Metabolic reprogramming in colon cancer
- Amino acid metabolism
- cellular aldehyde metabolic process
- Interconversion of nucleotide di- and triphosphates
- Disorders of fructose metabolism
- Cysteine and methionine metabolism
- Glycogen metabolism
- tRNA processing
- PID MYC ACTIV PATHWAY
- fructose 6-phosphate metabolic process
- deoxyribonucleotide biosynthetic process
